PROFESSIONAL SUMMARY

Results-driven Mobile Application Engineer with 3+ years of experience specializing in Flutter, Dart, and Native Android (Java) development. Proven track record in architecting scalable, high-performance cross-platform applications using Clean Architecture, Riverpod, and Bloc. Skilled in building offline-first architectures (Hive, SQLite, Room DB), integrating RESTful JSON APIs, and leveraging Firebase/Supabase real-time cloud ecosystems. Experienced in full lifecycle development—from Figma UI/UX prototyping to store release and performance optimization.

TECHNICAL SKILLS

Languages & Core:	Dart, Java, SQL, HTML/CSS, OOP, Clean Architecture, MVVM
Mobile & Frameworks:	Flutter SDK, Native Android SDK, Cross-Platform Engineering
State Management:	Riverpod, Bloc, Provider, GetX
Backend & Cloud Services:	RESTful APIs, Firebase (Firestore, FCM, Auth), Supabase, OneSignal Push
Databases & Storage:	Hive Caching, SQLite, Room DB, Shared Preferences
Developer Tools:	Git, GitHub, Android Studio, VS Code, Postman, Figma, Linux

PROFESSIONAL EXPERIENCE

Flutter Mobile Developer
May 2023 – Present

Freelance / Client Projects

- Architected, developed, and deployed 5+ production-grade Flutter applications for regional and international clients, managing full lifecycle development from initial wireframing to store publication.
- Engineered scalable state management architectures using Riverpod and Bloc, improving code maintainability, application responsiveness, and feature scalability across iOS and Android.
- Designed offline-first caching architectures using Hive and SQLite, significantly reducing redundant network requests and optimizing application startup times.
- Integrated RESTful JSON APIs, OAuth authentication flows, and background push notification pipelines using Firebase, Supabase, and OneSignal.
- Translated high-fidelity UI/UX mockups from Figma into responsive, pixel-perfect Flutter screen layouts adhering strictly to Material Design standards.

Android Developer
2022 – 2023

Independent Software Projects

- Developed native Android applications in Java utilizing MVVM design patterns and Material Design components.
- Implemented asynchronous network communication using Retrofit, persistent offline storage via Room DB, and background task scheduling using WorkManager.

FEATURED PROJECTS

LuxCar – Automotive Marketplace & Spec Finder | *Flutter, Dart, Firebase, REST APIs*

- Developed a high-performance vehicle catalog app integrating Auto.dev and CarImages REST APIs for live specs and high-resolution media rendering.
- Implemented secure user authentication pipelines and real-time database management via Firebase.

Radio Ava – Audio & Music Streaming Platform | *Flutter, REST APIs, Hive Caching*

- Architected a continuous audio streaming application supporting background playback and custom playlist persistence.
- Integrated high-speed Hive local caching to achieve seamless offline playback and immediate user favorite synchronization.

Movie & Media Discovery Platform | *Flutter, TMDb API, Firebase, Supabase, Hive*

- Built a dynamic media discovery application consuming TMDb REST APIs with real-time Firestore bookmark sync.

- Engineered an offline-first mobile architecture using Hive local caching to minimize network usage and enhance load speeds.

Kupa E-Commerce Application | *Flutter, Firebase, Figma, State Management*

- Built a full-featured mobile shopping application featuring interactive product catalog filtering, cart state management, and streamlined checkout flows.

Real-Time Messaging Platform | *Flutter, Riverpod, Firebase, OneSignal*

- Created a low-latency instant messaging solution supporting multi-device synchronization and customized background push notifications.

EDUCATION

B.Sc. in Software Engineering & Databases
An-Najah National University | Palestine
Expected Graduation: 2026

CERTIFICATIONS & LANGUAGES

- Meta Android Developer Professional Certificate
- Google Flutter Development Certificate
- **Arabic:** Native | **English:** Professional Proficiency
