Adeeb Sultan

Mobile Application Engineer | Flutter & Native Android

Palestine · +972 59 328 2184 · adeebsaltan@gmail.com · LinkedIn · GitHub · Portfolio

PROFILE SUMMARY

Mobile Application Engineer with 3.5+ years of experience building cross-platform apps in Flutter and Dart and native Android apps in Java. Delivered **5+ production Flutter applications** for regional and international clients, owning the full lifecycle from Figma prototype to store release. Applies Clean Architecture with Riverpod and Bloc, designs offline-first storage (Hive, SQLite, Room), and integrates REST APIs and Firebase/Supabase back ends. Software Engineering & Databases student at An-Najah National University (expected graduation 2026).

CORE COMPETENCIES

Mobile: Flutter SDK, Dart, Native Android SDK (Java), Cross-Platform Engineering, Material Design

Architecture: Clean Architecture, MVVM, OOP, Offline-First Design

State Management: Riverpod, Bloc, Provider, GetX

Backend & Cloud: RESTful APIs, Firebase (Firestore, FCM, Auth), Supabase, OneSignal, OAuth, Retrofit

Databases & Storage: Hive, SQLite, Room DB, Shared Preferences, SQL

Programming: Dart, Java, SQL, HTML, CSS

Tools: Git, GitHub, Android Studio, VS Code, Postman, Figma, WorkManager, Linux

Languages: Arabic (Native), English (Professional Proficiency)

EXPERIENCE

Flutter Mobile Developer, Freelance | Client Projects **May 2023 – Present**

Freelance engagements building Flutter apps for regional and international clients.

- Architected, developed, and deployed 5+ production-grade Flutter applications, owning the full lifecycle from wireframing to store publication.
- Built scalable state management with Riverpod and Bloc, improving maintainability and scalability across iOS and Android.
- Designed offline-first caching with Hive and SQLite to cut redundant network requests and improve app startup time.
- Integrated RESTful JSON APIs, OAuth flows, and push notification pipelines using Firebase, Supabase, and OneSignal.
- Translated Figma UI/UX mockups into responsive, pixel-accurate Flutter screens following Material Design guidelines.

Android Developer | Independent Software Projects **2022 – 2023**

Native Android applications built in Java.

- Developed native Android applications in Java using MVVM and Material Design components.
- Implemented networking with Retrofit, offline storage with Room DB, and background scheduling with WorkManager.

EDUCATION & CERTIFICATIONS

B.Sc. in Software Engineering & Databases | An-Najah National University — Palestine **Expected 2026**

Meta Android Developer Professional Certificate

Google Flutter Development Certificate

TECHNICAL PROJECTS

LuxCar — Automotive Marketplace & Spec Finder | GitHub

- Built a vehicle catalog app integrating the Auto.dev and CarImages REST APIs for live specs and high-resolution media.
- Implemented secure user authentication and real-time database management with Firebase.
- **Tech stack:** Flutter, Dart, Firebase, REST APIs

Radio Ava — Audio & Music Streaming Platform

- Architected a continuous audio streaming app with background playback and persistent custom playlists.
- Integrated Hive local caching for seamless offline playback and immediate synchronization of user favorites.
- **Tech stack:** Flutter, REST APIs, Hive

Movie & Media Discovery Platform | GitHub

- Built a media discovery app consuming TMDb REST APIs with real-time Firestore bookmark sync.
- Engineered an offline-first architecture with Hive local caching to minimize network usage and speed up loading.
- **Tech stack:** Flutter, TMDb API, Firebase, Supabase, Hive

Kupa — E-Commerce Application

- Built a full-featured shopping app with product catalog filtering, cart state management, and a streamlined checkout flow.
- **Tech stack:** Flutter, Firebase, Figma, State Management

Real-Time Messaging Platform | GitHub

- Created a low-latency instant messaging app with multi-device sync and customized background push notifications.
- **Tech stack:** Flutter, Riverpod, Firebase, OneSignal
